

Tower of Tumbling

Tray Tower

Tower Pieces

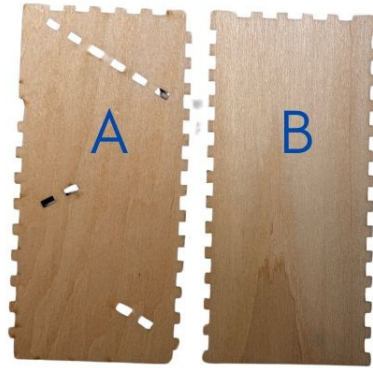

You will also need...

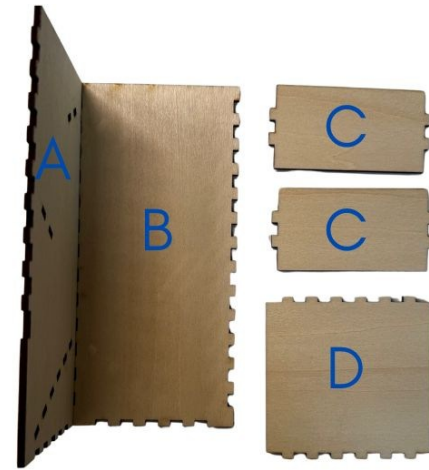

Some kind of PVA glue and a small brush.

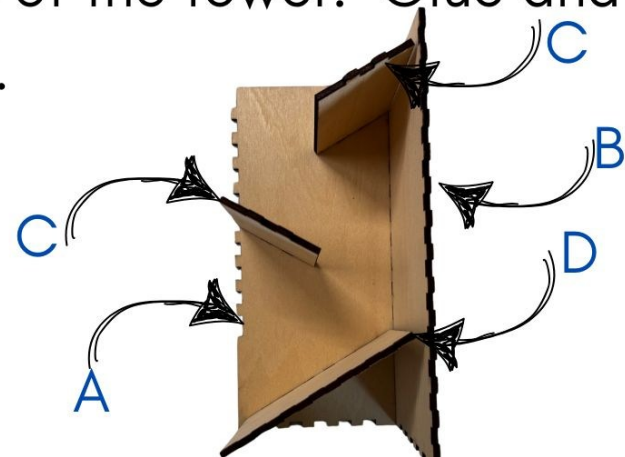

Take one Part A and Part B and attach

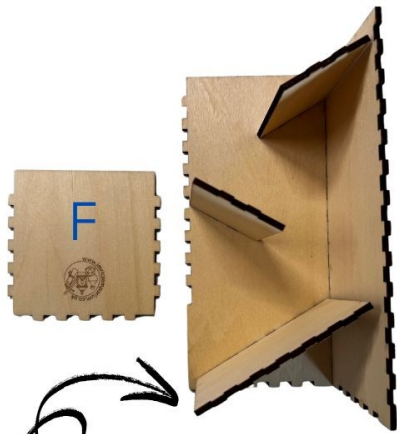

You will want to place some glue on one side. Push the two pieces together.

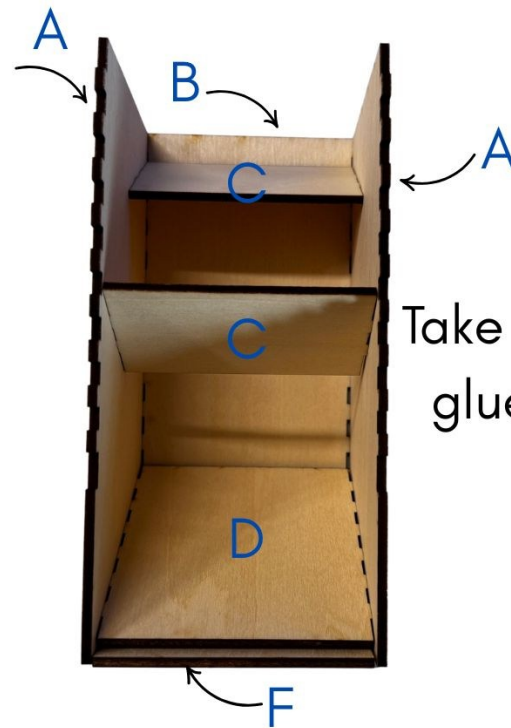

Get Parts C and D, these are the inside slopes of the tower. Glue and slot into Part A.

Part F is the base of the tower, it also has the Imric's Emporium logo. Glue up two sides to match Part A and B...the flat side of Part F should be at the front and the logo on the underside.

This is where the flat side of Part F should be.

Take the other Part A, and glue it to the other side of the tower.

Part E is the front of the tower, glue both sides and slot onto the front. This will hide the slopes inside, leaving a space at the bottom for the dice to exit.

All finished and ready for you to decorate!

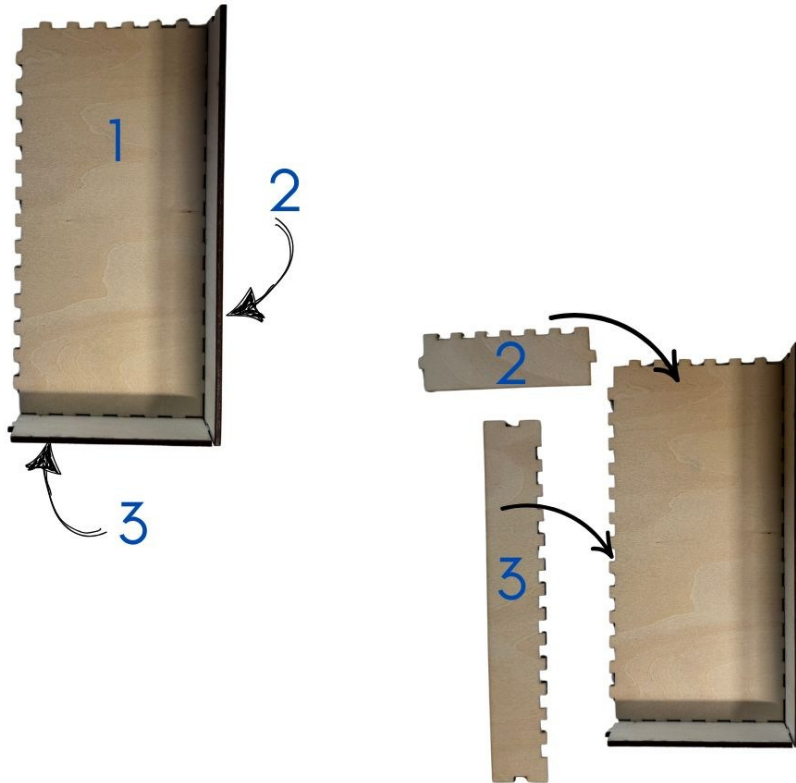

Tray of Tumbling

There are two Part 2 and 3. You will need your glue and brush to make this.

Start with Part 1 and one each of Part 2 and 3. You are going to attach these to one long side and one short side. Make sure Part 2 and 3 are also attached at the corner.

And then repeat attaching the two remaining sides.

Your tray is now ready to place the tower inside.

If you choose to decorate your tower (and why wouldn't you?)

remember that if you add anything to the sides of the tower it may no longer fit into the tower.
